

Student Clubs

ABES encourages technical, cultural and sports activities through student clubs and societies. Typical activities include coding and hackathon groups, robotics and electronics, cultural and dance/music teams, sports teams, and entrepreneurship support through the incubation centre. Club names and membership are updated every session; ask the student affairs office or check the ABES website for the current list.

Compiled September 2026 from publicly available sources (abes.ac.in and education portals). Figures change every session and some sources differ; confirm with the college before relying on them.
